

Infosim® takes over SKOOR AG for improved network management and ERP solutions

Würzburg, November 28th, 2023

The software company Infosim GmbH & Co. KG today announces the acquisition of the Swiss IT solutions provider SKOOR AG. SKOOR AG will continue to operate on the market independently as a subsidiary of Infosim GmbH & Co. KG. Founded in 2003, the international software company Infosim® is a leading provider of automated service fulfillment and service assurance solutions for telcos, ISPs, managed service providers and enterprises. Its main focus is on the development and distribution of the automated network and service management solution StableNet®. In addition to StableNet® and individual software development, the portfolio of the Infosim® Group also includes the ERP consulting company anaptis GmbH and now also the Swiss IT solution provider SKOOR AG.

"Infosim® and SKOOR have already worked closely on various projects worldwide to implement a cutting-edge, user-friendly network and service management solution," says Dr. Stefan Köhler, CEO of Infosim®. "With the acquisition, we can build on this synergy and provide long-term holistic solutions that today's large network operators require." As a pioneer in the field of Swiss Made Business Software, SKOOR specializes in developing innovative solutions for companies and business managers at all management levels by consolidating and visualizing relevant information in real time and making this insight accessible to users regardless of technical know-how. "Our joint projects have shown that SKOOR's technology perfectly complements StableNet® with its reporting and visualization capabilities. Additionally, Infosim® Group's global reach opens up great potential for both companies to support customers even better in their management tasks with real-time/near real-time management cockpits," says Martin Schneider, CEO of SKOOR. Along with its integration into StableNet®, SKOOR will also remain on the market as an independent KPI business software solution.

The Infosim® Group is excited to expand its portfolio and continuously improve upon network management and ERP solutions to companies around the globe.

SKOOR AG

SKOOR AG is an IT solution provider and has been developing exclusively Swiss-made software since 2001. The company provides business managers and service managers with real-time dashboards that allow them to monitor and manage their business processes and services end-to-end. SKOOR provides all relevant information about business development (trend), any difficulties (early detection) and optimization opportunities (efficiency and costs) in real time, so that those responsible have their business under control at all times.

StableNet®

Infosim® develops and markets StableNet®, the leading automated network and services management platform with a 4-in-1 solution that combines Inventory, Configuration, Fault, and Performance Management. It is available in two versions: Telco (for Telecom Operators and ISPs) and Enterprise (for IT and Managed Service Providers). Given the many operational and technical challenges of managing distributed and mission-critical IT infrastructures, StableNet® is the vendor-independent solution in today's multi-vendor environment.

Infosim GmbH & Co. KG

Infosim® is a leading provider of automated Service Fulfillment and Service Assurance solutions for Telcos, ISPs, Managed Service Providers, and Corporations. Since 2003, Infosim® has been developing and improving upon StableNet® for its Telco and Enterprise customers. Infosim® is privately held with offices in Germany (Würzburg - Headquarters), USA (Austin, TX), Singapore, and Switzerland. The portfolio of the Infosim® Group includes the network and service management solution StableNet® as well as individual software development, the ERP consulting company anaptis GmbH and the Swiss IT solution provider SKOOR AG. All products are available for a trial period and professional services for proof of concept (POC) can be provided upon request.
